MANAGEMENT DISCUSSION AND ANALYSIS REPORT

1. Industry structure and developments

The Indian Textile Industry is one of the leading textile industries in the world. The textiles and apparels sector is a major contributor to the Indian economy in terms of gross domestic product (GDP) which has grown at 8.6 per cent in real terms, industrial production and the country's total export earnings. Besides, the Indian Textile industry contributes 14 per cent of the total industrial production of the Country. This sector provides employment to over 35 million people and it is expected that the textile industry will generate new jobs during the ensuing years and is second largest provider of Employment after the agriculture sector. The industry went through a challenging FY 2011, with the global meltdown ravaging economies. The collapse in consumer sentiments, weak exports, noteworthy drop in discretionary spending in textiles/apparels and down trading by the consumers put immense pressure on both the top-line and the bottom-line of textile companies. However, the Government is making efforts in boosting the textile industry through various initiatives and investments are increasing steadily.

2. Opportunities and Threats

The Government have taken a number of steps for expansion of T&C sector including technology upgradation and modernization of textile mills under the Technology Upgradation Fund Scheme, support for industry infrastructure through Scheme for Integrated Textile Parks (SITP); Integrated Scheme for Development of Powerloom Sector along with Group Workshed Scheme for the sector; Scheme for skill upgradation of textiles workers under the Integrated Skill Development Scheme and other capacity building programmes for the industry like Knitwear Technology Mission. In addition, fiscal incentives are provided for exports of T&C items under various provisions of the Foreign Trade Policy 2009 -14. The Government has also initiated a number of steps for weaving and processing sector which include interest reimbursement, margin money subsidy and capital subsidy under TUF Scheme. The exports of readymade garments and made-ups increased by over 10% in 2008 - 09 compared to 2007-08 but there was a decrease of around 1% in 2009 -10 compared to 2008 - 09.

However, significant risks remain: (1) in many economies, the recovery is largely driven by government spending whilst consumer sentiments remain fragile; (2) high levels of global liquidity have led to steep increases in commodity prices and interest rates; (3) emerging markets are likely to face increased inflationary pressures; (4) developed economies are facing large budget deficits and (5) lower growth rates in the production of mill, power loom etc.

3. Performance

Overall performance

The overall performance during the year 2010-11 has been reasonably satisfactory. This has been possible due to:
